

OAKLEY PRIZM LENS TECHNOLOGY IS A VISION GAME CHANGER

Prizm is a revolutionary lens technology from Oakley that dramatically enhances detail to improve performance. It provides ultra-precise color tuning, designed for specific environments.

Fine-tuning vision and optimizing contrast, Prizm lenses reveal details that would typically be missed by the naked eye. Whether on the mountain, road, water, field or course, Prizm lenses allow athletes and consumers to see details earlier, faster and deeper, resulting in an enhanced experience.

HOW IT WORKS: By fine-tuning individual wavelengths of color, Prizm sharpens visual acuity to reveal nuances

OPTIMIZED PERFORMANCE: Improves performance and confidence with increased depth perception

SEE THE DETAILS: Enhances detail recognition to see colors more vividly

ATHLETE APPROVED: Worn by Oakley athletes during the most prestigious sporting events in the world and in their everyday lives
